

2SIMPLE MUSIC TOOLKIT

<http://www.2simple.com>

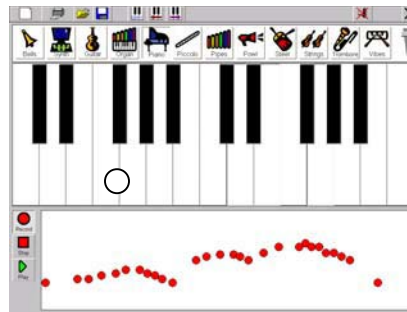

This new piece of music software introduces concepts of rhythm, pitch, melody, tempo, harmony and composition. This programme enables children from Foundation Stage, KS1 and KS2 to work independently to explore music, sound and instruments and even perform their own compositions, whatever their ability or musical experience. The six programmes in this suite are closely linked with the QCA schemes for Music and ICT and have been designed to help non-specialists teach core musical concepts.

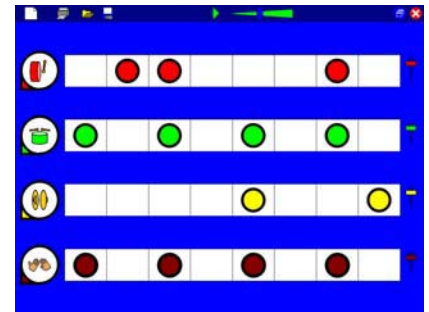

2Explore

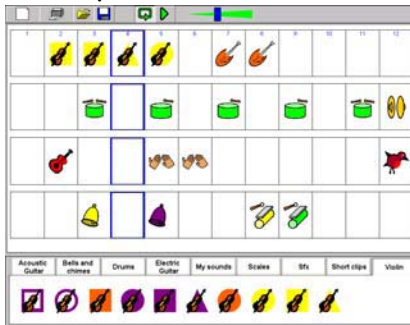

2Play

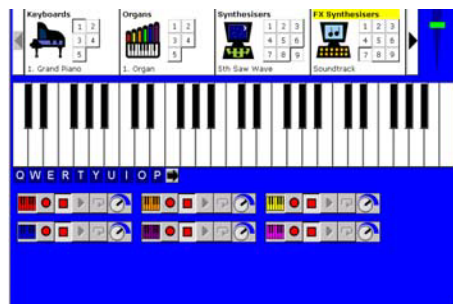

2Beat

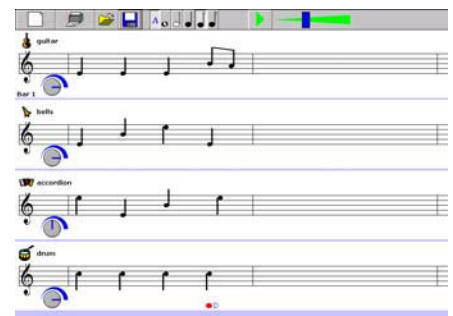

2Sequence

2Synthesise

2Compose

The **videos** contain examples of how to use the software in a teaching context. The activities they show are planned to illustrate ways that 2Simple toolkit can be used to teach aspects of the QCA scheme of work for Music and ICT
